PROFILE

Results-driven web developer, fluent in English, with 2 years of experience transforming creative ideas into web experiences. Proficient in designing and maintaining high-quality websites, focused on social media, video streaming, and digital services. Skilled in HTML, CSS, JavaScript, and PHP. 4-year background in software and hardware troubleshooting, with a proven track record of developing projects with cross-functional teams.

PROJECTS

Rick & Morty Character Wiki

Sep, 2023-Oct, 2023

Rick & Morty Character Wiki where users can navigate to investigate characters, locations, and episodes, and also check if a character is alive or dead. It was done with React JS 18.2.0, retrieving data from a Rick and Morty API and styled with bootstrap 5.3.2.

Netflix Clone

Oct, 2023-Nov, 2023

Netflix clone where users can sign in and log in, they can add favorite movies or delete them. ReactJS 18.2.0 version was used, Tailwind CSS 8.5.5, Firebase 10.4.0 for data, NoSQL cloud database Firestore for managing the backend, and also applied Authentication package service.

Twitter Clone

Dec, 2023-Jan, 2024

Twitter clone where users can share ideas and comment, for sharing ideas they have to be registered, and then log in. They can post their ideas, comment, or just give a like. Laravel Framework 10.35.0 was implemented, storing data in a web SQL server, deployed at Vercel CLI.

EMPLOYMENT HISTORY

IT Request Management Analyst

Teleperformance

2021-2023

Delivered 1 level service in 5 Latam countries, while handling 9 users per day. Responsibilities included preparing cases for analysis and addressing software and web application needs. Hands-on involvement in both service delivery and web application maintenance.
